U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05)

DETAILED ACTION

Applicant's amendment dated 08/31/05 puts claims 1-7 in allowable form. Claims 12-18 were previously indicated as being allowable. Claims 19 and 20 are newly added. However, a routine updated search yields prior art that reads on claims 8, 9, 12-16, and 18. Therefore, the Examiner regretfully withdraws the allowability of claims 12-16 and 18.

Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Weisse et al. (5,516,593).

Weisse discloses a hollow fan blade (Figs. 1-5) comprising a first substrate having a root edge and an opposite tip spaced radially outward from the root edge (Fig. 4), the substrate further including a leading edge opposite a trailing edge, the leading edge spaced chordwise from the trailing edge; and a second substrate (Fig. 2); and a plurality of curved cavities 44 (Fig. 2) between the first and second substrates, each of the plurality of curved cavities terminating in a first closed end adjacent the tip of the blade; wherein each of the plurality of cavities is formed adjacent at least one elongated continuous curved rib (Fig. 4).

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Application/Control Number: 10/765,741

Art Unit: 3745

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 12-16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weisse et al. in view of Nelson (3,628,226).

Weisse inherently discloses a method for making a hollow fan blade (Figs. 1-5) including the steps of (a) forming a plurality of curved, continuous cavities 44 on a first substrate to form a plurality of curved ribs 36 (Figs. 4, 5) with the cavities on either side of each of the plurality of ribs; (b) abutting the plurality of ribs on the first substrate with a second substrate to form a hollow fan blade (Fig. 2);

forming a plurality of ribs on the second substrate and wherein the step (b) further includes the step of abutting the ribs on the first substrate with the ribs on the second substrate (Fig. 2);

wherein the plurality of ribs do not intersect one another (Fig. 4);

wherein each of the plurality of ribs is not intersected by any other ribs between its opposite ends (Fig. 4);

wherein the plurality of ribs are substantially parallel in a region adjacent a root edge (Fig. 4).

However, Weisse does not disclose forming a plurality of curved, continuous cavities by machining as claimed.

Nelson teaches a method of making a hollow fan blade (Figs. 1-10) comprising the steps of machining a plurality of first continuous cavities on first and second substrates (col. 2, lines 41-46) and abutting the first substrate with the second substrate to form a hollow fan blade (Fig. 2).

It would have been obvious to a person having ordinary skill in the art at the time the invention was made, to apply the method of making a hollow fan blade of Weisse with the step of forming a plurality of curved, continuous cavities by machining as commonly done in the art.

Allowable Subject Matter

- 3. Claims 1-7, 19, and 20 are allowed.
- 4. Claims 10, 11, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 1 patent.

Porter et al. (5,063,662) is cited to show a method for making a hollow fan blade.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Ninh Nguyen whose telephone number is (571) 272-4823. The examiner can be normally reached on Monday-Friday from 7:30 A.M. to 5:00 P.M.

Art Unit: 3745

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look, can be reached at (571) 272-4820. The fax number for this group is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, please go to http://pair-direct.uspto.gov or contact the Electronic Business center (EBC) at 866-217-9197 (toll-free).
